

ENVIRONMENT POLICY

As a producer company in the international energy sector, we are determined to fulfill our responsibilities regarding environmental protection with our approaches described below.

In order to fulfill our environmental goals in the areas where we carry out our activities; prevents pollution, investigates the negative effects of environmental effects on the environment and human health, to eliminate these effects at the source or bring them to standard levels;

- ❖ We follow the legal and other requirements and make the necessary plans to comply with them,
- ❖ We select the technology and material taking into account environmental impacts,
- ❖ We work in cooperation with interested parties,
- ❖ We organize trainings to raise awareness of our employees and suppliers when necessary,
- ❖ We explore possible opportunities for reducing material and energy use and minimizing waste,
- ❖ We ensure the recycling and disposal of our waste in accordance with legal requirements.

We carry out our environmental studies within the Environmental Management System, and aim to continuously improve them through internal / external audits and periodic reviews.
