

INFORMATION SECURITY POLICY

- Our main goal is to protect Information.
- For this, we aim to ensure risk management, measure Information Security Process Performance, and arrange relations with Third Parties on information security-related issues.

In addition, the three basic elements of the Information Security System;

- Confidentiality : Preventing unauthorized access to important information,
- Integrity : Demonstrating that the accuracy and integrity of the information is provided,
- Availability : Availability of information when needed by authorized users,

It is our information security policy. As the management, I declare that the implementation and control of the "Information Security Policy" and the enforcement of the necessary sanctions in case of security violations are supported by the management.’’
